Locking your Android

The phone may contain personal information and conversations. One of the ways to protect this data is to lock the device with a password.

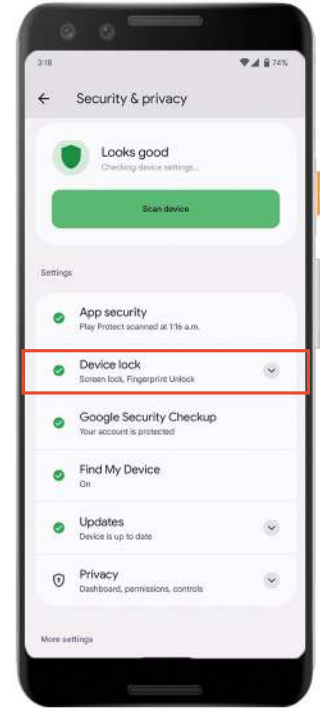

1. Go to the phone **Settings**

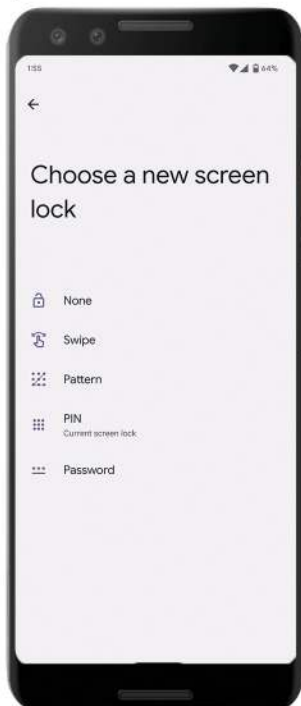

2. Select **Security and privacy**

3. Click on the submenu **Device lock**

4. Chose a **New screen lock**

5. Determine the protection mode of the phone, it can be a **pattern**, a **PIN** or a **password**.
